### **EXPERIENCE**

# • Internship as Unity Developer

DigitalTwin Technology GmbH Barcelona, Spain (September 2024 - August 2025)

Developed an already established Unity project by working with cross-disciplinary teams to design and enhance interactive UI/UX elements using Unity Editor scripting, which increased user engagement and retention. Implemented solutions in Unity using C# programming, WebGL optimization techniques, and refined 3D model interactions, reduced load times and smoother real-time performance within multiple platforms and devices. Designed and integrated an automated Unity build packaging tool using C# and Unity Editor scripting, integrated with Inno Setup. Implemented a dynamic

language-switching system by programmatically swapping the usage of Unity's ScriptableObjects at runtime, reducing manual configuration effort and ensuring effective content updates between different languages based on the user's needs
